Stockholm School of Economics   **Riga, Latvia**
Study Abroad Program Exchange Semester   December 2017
- Selected coursework: Economic Statistics, International Finance, Financial Mathematics, Specialization in Economics

SKILLS

Relevant Skills: Machine Learning, Deep Learning, NLP, LLMs fine-tuning, Data Engineering, API development, Data Analytics, Business Intelligence, Web Scraping, Statistical Analysis, A/B testing
Related Platforms: Python (advance), R (advance), SQL (advance), Docker (advance), Redis, MongoDB, Cassandra, Neo4j, Git/GitHub, Bash/Linux, AWS, Power BI (intermediate), QlikView, Excel, Power Point, HTML & CSS & JS (high familiarity)
Related Frameworks/Libraries: **Python**: PySpark, Scikit-Learn, SpaCy, PyTorch, MapReduce, Hadoop, Beautiful Soup, Scrapy, Pandas, Numpy, Flask, Selenium and other data science libraries; **R**: tidyverse, data.table, shiny and other data analytics libraries

EXPERIENCE

SymTrain   **Nashville, TN**
AI Engineer, Capstone Project   September 2024 – December 2024
- Developed customer service simulations using computer vision and vision-language models for seamless video analysis
- Developed and deployed API endpoints on AWS infrastructure, ensuring seamless integration and optimal performance
- Automated detection of UI elements, including buttons and text fields, as well as cursor location, using computer vision

Vanderbilt University – Data Science Institute   **Nashville, TN**
Artificial Intelligence Engineer   May 2024 – August 2024
- Fine-tuned Llama LLMs on NVIDIA A100 GPU using PEFT for optimized performance
- Developed a RAG-based chatbot leveraging the OpenAI API (GPT-4) for contextual information retrieval

Vanderbilt University – Owen Graduate School of Management   **Nashville, TN**
Research Assistant   November 2023- May 2024
- Developed API connection with Companies House API to automatically download financial reports of companies
- Automated the creation of JSON documents showing all legal information of companies

Azerconnect LLC   **Baku, Azerbaijan**
Senior Data Scientist   April 2022- August 2023
- Built machine learning models (KNN, K-means) for classification of customer base
- Built churn predictive modelling, was able to reduce monthly churn rates by 1.5% (approx. 3500 Subs)
- Implemented workflow automations, such as email sending with auto designated excel documents

Business Intelligence and Analytics Specialist   September 2021 - April 2022
- Implemented daily analysis of subscriber base in terms of various KPIs in R studio
- Created regular informative dashboards for management decisions

ADDITIONAL
- Language Skills: English (Fluent), Azerbaijani (Native), Turkish (Native)
